

## SOCIAL AWARENESS

Various dental camps were organised for healthcare outreach program that focused on promoting oral health and providing basic dental care services to people who may not have regular access to dental care. The purpose of organizing a dental camp was to create social awareness about the importance of oral hygiene and preventive measures to maintain good oral health.

Dental camps were organized in various settings such as schools, community centres, primary health centres, and other public spaces. The camps usually offered free dental check-ups, screenings, and basic treatments such as cleaning, fillings, and extractions.

Organizing a dental camp created social awareness about oral health and hygiene in several ways.

For example:

**Education:** The camp provided educational sessions about the importance of oral hygiene, the causes of dental diseases, and how to prevent them. This helped people to understand the importance of taking care of their teeth and maintaining good oral health.

  
**Principal**  
Subbaiah Institute of Dental Sciences  
NH-13, H.H. Road, Purle  
SHIVAMOGGA-577 222, Karnataka

Screening camp /Early detection: The camp can also help to identify dental problems at an early stage, which can prevent more serious and costly treatments later on. Early detection can also improve the chances of successful treatment and prevent the spread of dental diseases.

Community engagement: Dental camps helped to build community engagement and create a sense of social responsibility. This encouraged people to take an active role in promoting oral health and hygiene in their communities.

Overall, various dental camps were organised to create an effective way for social awareness about oral health and hygiene, and to promote basic dental care services to people who may not have regular access to dental care.

TOBACCO CESSATION CENTER

LECTURE ON ILL EFFECTS OF TOBACCO CHEWING HABITS

Tobacco cessation center allows to make a positive impact on people's lives. The primary goal of our tobacco cessation center is to help people quit smoking or using other tobacco products.

Objectives include:

Conducting assessments: conduct assessments to determine the level of nicotine addiction and the appropriate treatment plan for each individual.

Providing counselling: providing counselling to individuals who are trying to quit smoking or using other tobacco products. This may involve individual or group counselling sessions.

Educating clients: to educate clients on the health risks associated with smoking or using tobacco products and the benefits of quitting.

Developing treatment plans: to work with clients to develop personalized treatment plans that may include counselling, nicotine replacement therapy, and medication.

Providing support: to provide ongoing support to clients throughout their quitting journey, including follow-up appointments and check-ins.

Collaborating with other healthcare professionals: to collaborate with other healthcare professionals, such as doctors and nurses, to ensure that clients receive comprehensive care.

## SAVE SOIL DAY CELEBRATION

Save Soil Day is a day dedicated to raising awareness about the importance of soil conservation and the preservation of soil health. This day is observed on the 5th of December every year.

Soil is a vital resource for agriculture, forestry, and other human activities, and it plays a crucial role in supporting plant and animal life. Unfortunately, soil degradation, erosion, and pollution are significant environmental problems that can negatively impact soil health and fertility.

Save Soil Day aims to raise awareness about these issues and to promote practices that can help to protect and conserve soil resources. Here are some ways in which you can contribute to soil conservation:

**Practice sustainable agriculture:** This includes practices such as crop rotation, reduced tillage, and the use of organic fertilizers, which can help to maintain soil fertility and reduce erosion.

**Reduce water pollution:** Reducing water pollution can also help to protect soil health. Avoid using pesticides and other chemicals that can leach into the soil and contaminate water sources.

**Plant trees and vegetation:** Trees and vegetation can help to stabilize soil, prevent erosion, and improve soil fertility.

**Compost:** Composting organic waste can help to reduce waste and produce nutrient-rich soil amendments that can be used to improve soil health.

Support soil conservation initiatives: Support local and global initiatives that promote soil conservation and encourage sustainable practices.

By taking these actions, our institute helped to protect and conserve soil resources and contribute to a healthier and more sustainable environment.

## WORLD HEALTH DAY

World Health Day is a global health awareness day celebrated on April 7th every year. This day was observed to raise awareness about the importance of global health and to encourage people to take action to improve their health and well-being.

Each year, World Health Day we celebrate focuses on a specific health theme that is of global concern. The theme for World Health Day 2021 was "Building a fairer, healthier world", which highlighted the inequalities that exist in access to healthcare and the need for action to address these disparities.

The World Health Organization (WHO) organizes events and activities around the world to mark World Health Day. These events include seminars, workshops, health camps, and awareness campaigns. The goal of these events is to raise awareness about the theme and to encourage people to take action to improve their health and the health of their communities.

World Health Day is an opportunity for individuals, organizations, and governments to come together to promote health and well-being for all. It is a reminder that health is a fundamental human right, and that everyone has a role to play in creating a healthier and more equitable world.

## NSS CAMP

SS (National Service Scheme) Sampling Plants Day was celebrated to promote the importance of plant biodiversity and conservation. The day was observed by our team on the 21st of June every year.

The main goal of NSS Sampling Plants Day is to encourage students and community members to explore the diversity of plant life around them and to learn about the importance of plant conservation. NSS volunteers typically organize events and activities to mark the day, including:

Objectives included:

**Plant sampling and identification:** Volunteers may organize plant sampling and identification activities to help participants learn about the different plant species in their local environment.

**Planting activities:** Volunteers may organize tree-planting activities to promote afforestation and to raise awareness about the importance of planting trees for the environment.

**Workshops and seminars:** Volunteers may organize workshops and seminars to educate participants about plant conservation and the importance of biodiversity.

**Clean-up drives:** Volunteers may organize clean-up drives to remove litter and waste from natural areas and to promote the conservation of natural habitats.

**Awareness campaigns:** Volunteers may conduct awareness campaigns to raise awareness about the importance of plant conservation and to

encourage community members to take action to protect plant biodiversity.

NSS Sampling Plants Day is an opportunity for NSS volunteers and community members to come together to promote plant conservation and to learn about the importance of plant biodiversity for the environment and for human well-being. By promoting plant conservation, we can help to ensure a sustainable future for ourselves and for future generations.

## BLOOD DONATION CAMP

A blood donation camp was organized to collect blood from donors who voluntarily donate their blood. The collected blood will be then used for transfusion purposes, which can save the lives of people in need. Blood donation camps are often organized by hospitals, blood banks, non-profit organizations, and community groups.

### **Features of a blood donation camp:**

**Voluntary donation:** Blood donation is a voluntary process, and donors are not paid for their donation. The donors should be in good health and meet the eligibility criteria for blood donation.

**Donor registration:** Donors need to register themselves before donating blood. The registration process typically involves filling out a form that includes personal information, medical history, and other relevant details.

**Blood collection:** Blood is collected from donors using sterile needles and tubes. The amount of blood collected varies depending on the donor's weight and health status.

**Blood testing:** All donated blood is tested for infectious diseases, such as HIV, hepatitis B, hepatitis C, and syphilis, to ensure that it is safe for transfusion.

Donor care: After donating blood, donors are provided with refreshments and rest to help them recover from the donation process.

Blood donation camps are important because they help to maintain a steady supply of blood for transfusion purposes. Blood transfusion is often required in emergency situations, such as accidents and surgeries, as well as for people suffering from certain medical conditions. By donating blood, you can help to save lives and make a positive impact on the community.

Celebration of World Suicide Prevention Day on 10<sup>th</sup> September 2022

**Celebration of World Suicide Prevention Day on  
10<sup>th</sup> September 2022**

Dr. K'S Shubrata is MD Psychiatrist, working as Professor in Subbaiah Institute of Medical Sciences and also is serving in various organisation like Psychiatry Specialty Section of Indian Psychiatry Society, Convener of Art of Psychiatry section of Indian Association of Private Psychiatry and Editor of Indian Medical Association Shimoga Pulse Magazine. She has more than 300 medical articles in various state level magazines and five books to her credit. She has received many awards, to name a few, Donal J Cohen Fellowship for child psychiatry, Young Investigator award by Royal College of Psychiatrists, London, Etc.

Gathering also included, Executive Director of Subbaiah Institute of Dental Sciences — Dr. Vinaya Srinivas, Principal and Vice Principal of the college - Dr. Suresh B S and Dr. Mithum K respectively. Many Heads of the Department, faculty members and students were present. Dr. K'S Shubrata gave an enlightening talk on the issues and how to cope up with mental health issues. She emphasized on many important points and gave us immense and deep knowledge on the topic. She also made the session interesting by conducting quiz and also gave away small gift as a token of appreciation to the participants who actively took part.

There were 113 participants and as per the feedback received, it was a very good learning experience and the lecture helped them in understanding today's scenario.

## Celebration of Children's Day

Subbaiah Dental College On the occasion of Children's Day on 14th November 2022, Subbaiah Institute of Medical Sciences and Subbaiah Institute of Dental Sciences conducted screening camp and drawing competition for children was conducted at Subbaiah Institute of Dental Sciences.

CELEBRATION OF NO TOBACCO DAY ON 31<sup>ST</sup> MAY 2022

Subbaiah Dental College, Dept of Public Health Dentistry and Dept of Prosthodontics conducted a denture camp at McGann Hospital, Shimoga on 16th July 2022. The Danta Bhagya camp was led by Dr. Anil (Assistant Professor in Dept of Public Health Dentistry), Dr. Neha and Dr. Harshitha (from Dept of Prosthodontics) with interns. 21 patients were screened and primary impression was taken.

CELEBRATION OF WORLD ENVIRONMENT DAY ON  
6<sup>TH</sup> JUNE 2022

CELEBRATION OF WORLD HEALTH DAY ON 7<sup>TH</sup> APRIL 2022

## CELEBRATION OF WORLD HEALTH DAY ON 7<sup>TH</sup> APRIL 2022

Special Olympics Bharat enters the Guinness Book of World Record and we are proud that we were a part of the program and served the country for a noble cause.

The Union Govt of India had planned a grand celebration on the 75th Independence Day of India and named it as AZAADI KI AMRIT MAHOSHTAV. Special Olympics Bharat is an event under AZAADI KI AMRIT MAHOSHTAV. Dentistry, Ophthalmology and General Medicine are the 3 branches collaborating with Special Olympics Bharat. The Federation of Special Care Dentistry and Special Olympics Bharat collaborating with the Govt. conducted a joint event on 7th April 2022 on the occasion of World Health Day all over India.

In Shimoga District, a dental team from Subbaiah Institute of Dental Sciences, Sharavathi Dental College and few private practitioners had this golden opportunity to be a part of this program and serve the people

of our country. The dentists screened the disabled and special children at Govt 1st Grade College, Shimoga Road, Sagara. From Subbaiah Institute of Dental Sciences, the dental team included faculty members - Dr. Suresh B S (Principal), Dr. Suma (HOD & Professor of OMR), Dr. Pramod (HOD & Professor of Oral Surgery), Dr. Bhakti (Dept. of PHD), Dr. Anubhav (Dept of Oral Surgery), Dr. Chethan (Dept. of PHD), Dr. Ankitha (Dept of OMR), Dr. Hridya (Dept. of Pedodontics), Dr. Vijay (Dept of Pedodontics) and Dr. Chidandeshwara (Dept of Orthodontics). Our interns including Dr. Akshitha, Dr. Usha, Dr. Shruti, Dr. Medha, Dr. Amruta Varshini and Dr. Pooja had an opportunity to be a part of this program and to volunteer.

We are thankful to Dr. Vikram S Kedlaya, the Assistant Clinical Director of Shimoga District, Dr. T Mohamed Maqsood, Dr. Vinay and Dr. Keerthi to give us this opportunity to be a part of Special Smiles Oral Screening Program under Special Olympics Bharat. It was a very well-organized event and an amazing.

Along with NSS, Dept. Of Public Health Dentistry had held a dental screening and treatment camp at Hanumanthpura, Purudal on 26th March 2022. A dental team was led by Dr. Zuraiz and Dr. Karunya. A successful treatment and screening camp was conducted for about 64 patients where 17 of them were treated in the mobile dental van and the others were referred to Subbaiah Institute of Dental Sciences for further treatment.

On the occasion of World Oral Health Day on 20th March 2022, Dept of Public Health Dentistry had held a screening camp lead by Dr. Bhakti at Come Back Children's Home in Shimoga. Come Back Children's home is a home to 14 children from the age 5 to 14years. Dr. Jahnavi(Intern) gave an interactive health educational talk and other interns performed a skit for the children on importance of oral health, oral health related problems and visit to a dentist. A great initiative by Mr. Christopher and Mrs. Janani, who run this orphanage and they gave us this opportunity to spend some time with the children.
