ETHICS IN RESEARCH

SYLLABUS

There is a definite shift now from traditional patient and doctor relationship and delivery of dental care. With advances in science and technology and the increasing needs of the patient, their families and community, there is a concern for health of the community as a whole. Dental professional like other health professional are confronted with many ethical problems. It is therefore absolutely necessary for each and every one in health care delivery to prepare them to deal with these problems. To accomplish this and develop human values council desires that all the trainees undergo ethical sensitization by lectures on ethical issues

1. Introduction to ethics:

- What is ethics?
- What are values & norms?
- How to form a value system in one's personal & professional life?
- Declaration of Helsinki, WHO declaration of Geneva, International code of ethics, DCI code of ethics.

2. Ethics of the individual:

- The patient as a person
- Right to be respected
- Truth and confidentiality
- Autonomy of decision
- Doctor patient relationship

3. Professional ethics:

- Code of conduct
- Contract and confidentiality

4. Research ethics:

- Animal and experimental researches/humanness
- Human experimentation
- Human volunteer research informed consent
- Drug trials
