(Recognized By Dental Council of India, New Delhi, DCI No. V.I2017/5/2019-DE,)

Affiliated to Rajiv Gandhi University of Health Sciences, Bangalore

## 2.6.4 Presence and periodicity of parent-teachers meetings, remedial measures undertaken and outcome analysis

The main objective of the Parent-Teacher meeting is to create a common platform, where teachers and parents come together to discuss student's performance and devise ways to enrich their learning experience. It is an effort to appraise the parent about their ward's progress. In addition, it also facilitates parental participation in student's education, where the parent and teacher intend to co-operate and support the students' learning.

In SUIDS, PTM is conducted periodically for all the students after the Internal assessment exams. All parents are intimated about the meeting well in advance from the Principal's office via letters, email, and SMS with the details of student's performance in academics and attendance. PTM is conducted on a prescheduled day. Parents meet the respective subject HoD/staff and also mentors for obtaining their ward's progress report for the session.

The interaction between each student's parents and faculty is kept individual and private. Parents are briefed about the student's clinical/ pre-clinical work completion, academic performance, and progress.

Deficiencies are identified and the avenues for improvement are explained and documented. Remedial measures as one on one discussions during practical classes and during clinical postings. Question papers and the topics which they find hard are discussed.

Those students who are weak in practical aspects are asked to repeat exercises after repeat demonstration by the faculty. The dental syllabus is progressive from the beginning of the academic year through three terms (topics are different for all the three terms) till the University Examination and hence the evaluations are also progressive. So the results for the remedial measures are evident only in the University Examination.

Disciplinary issues, if any, are also discussed with the parents. For parents unable to come on the specified date, SMS, e-mails, and posts are sent and they are asked to meet at another convenient date. Parents also interact with the student mentors and they are briefed about the overall progress of the students.

Parents are asked to give feedback about teaching-learning assessment, infrastructure, and hostel. Feedback analysis and reports are made. Valid points are noted down for corrective measures. The analyzed reports show that the students tend to do better in their academics when parents get involved.

It has also aided in making students physically and mentally stable and has paved the way to have a harmonious study environment. Parent-Teacher Meeting is a great opportunity for parents and teachers to develop a healthy and strong relationship for the holistic development of the students to achieve better learning outcomes.
